

Business Central Wireless Manager

Business Central is a secure, cloud based IT service platform designed to provide small to mid-sized organizations with an affordable way to establish, provision and manage key IT networking services, effortlessly.

Introducing Wireless Manager

Manage your entire WiFi network across multiple borders, cities, buildings and floors, securely through the cloud with Business Central Wireless Manager. Anytime, anywhere.

One View. Multiple Possibilities

Using a single portal dashboard, bring multiple sites, access points and users under one management umbrella within minutes. Manage wireless SSIDs, control guest access on your network, and run bandwidth usage reports with a few clicks. Achieve full visibility of your network with real-time alerts to keep you in total control of evolving service needs from day one. With Wireless Manager managing your wireless network, you can focus on managing your business.

Ease of Use

Getting started with Wireless Manager is as easy as 1-2-3. Simply sign up to a new account today to get free access for 90 days, select your compatible ProSAFE® Access Point and upload cloud firmware (if required) and connect! There are no commitment or contracts to sign allowing you to try before you buy. For continued service beyond 90 days, simply choose a license to suit your duration needs and number of APs deployed.

Flexibility

Your network is unique. Allowing it to grow and change to suit your needs to deliver business outcomes that matter is fully supported with Wireless Manager. Manage single APs at a handful of sites, hundreds at one location, or manage thousands of APs across multiple sites. Wireless Manager can scale flexibly to meet your needs and help deliver an optimized network.

10 Reasons to choose NETGEAR® Business Central Wireless Manager

1. **Secure web browser access** offering anytime, anywhere management access eliminating the need for on-site premise support for configuration changes
2. **Private and public wireless control** extends access to staff and guests alike on your terms, putting you in control of your network
3. **Fee based or free access options** allow you to generate income/return on investment and to monetize WiFi access for select users
4. **Single Sign On with MyNetgear.com** simplifies ownership of all your NETGEAR products and services by bringing them all under one umbrella for registration and support purposes.
5. **Pay as you go licensing** allows you to optimize your IT budgets and only pay for what you need, when you need it
6. **Wireless manager is a controller-less service.** This makes for an easier, faster, better deployment set up with an intuitive web browser with no management hardware to install, configure or maintain
7. **Co-termination licensing management** ensure you always have one end date for all licenses regardless of the number of APs in your network, placing you firmly in control of IT budget and renewal timelines. As you add, move and change APs, know exactly when your licenses will run out and get 30 days notification to help plan renewals
8. **Robust wireless security** delivers truly unified wired and wireless access without compromising on security through use of identity based support for RADIUS, Active Directory and internal/external AAA servers
9. **Automated load balancing** helps you deliver better customer service and customer satisfaction with minimal configuration time required from IT staff for a balanced network. Ensure even distribution of clients amongst deployed APs
10. **Flexible Deployment Scalability.** Scale the network to support anything from 1 AP on one site to thousands of APs across multiple sites
